

RAD Mobile Microwave Link

Connectivity solutions that can be deployed in minutes - a growing demand in today's fast-paced world.

RAD Mobile Microwave Link: A point-to-point broadband wireless microwave network solution built with RAD's Airmux-400 and Megaplex-2100 products. Integrated in a rugged, water-proof, light-weight case, the Airmux-400 offers cost-effective radio connectivity over distances up to 75 miles. Its multiband radio enables programmable operating frequency anywhere within 2.4 GHz and 4.9 to 5.8 GHz bands. The Megaplex-2100 multiplexer serves as an all purpose access device for a broad range of services.

BENEFITS

- Allows you to maximize return on investment
- Affordable solution with programmable operating frequency anywhere within 2.4 GHz and 4.9 to 5.8 GHz bands
- Flexibility to support Ethernet, T1, 2-way radio, video, low-speed data and other services
- Highly-reliable with greater than 99.99% uptime
- Ability to monitor and troubleshoot the entire communications system from one location
- Fast, high-speed, 18 megabit broadband connections
