

MegaPlug™ 85 Mbps 4-Port Hub

Actiontec's new MegaPlug™ 85 Mbps 4-Port Hub expands your network without breaking your bank. Perfect for use with DSL modems, gateways, or broadband routers with just one Ethernet port, the 4-Port Hub works seamlessly with the MegaPlug 85 Mbps Ethernet Adapter to provide network coverage in every room of your home or small office with an electrical outlet. There's no easier or more affordable way to extend your home network than the Actiontec MegaPlug 85 Mbps 4-Port Hub.

End the Ethernet Port Drought

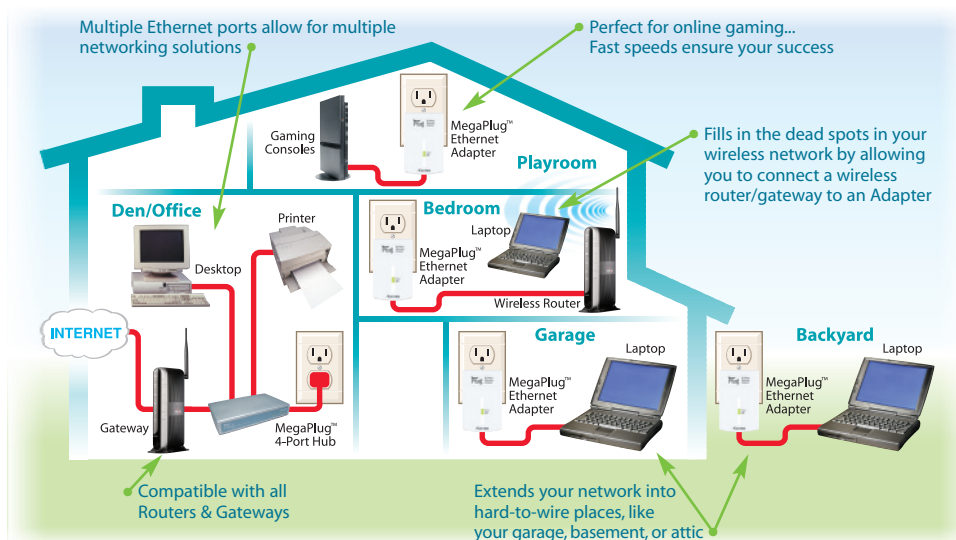

Ethernet ports are valuable. They are often the only way to connect computers, printers, and other devices (scanners or networkable hard drives), share Internet connections, or quickly transfer large amounts of data. Unfortunately, many of the components at the heart of a network, like DSL modems or gateways, feature only a single Ethernet port, leaving you with no way to expand your network. Enter the MegaPlug 4-Port Hub. By adding multiple Ethernet ports to your network, suddenly, the possibilities are endless. Now you can send data from a computer in the study to one in the family room or use the printer in the bedroom from a computer in the kitchen. You'll be amazed at what you can do!

The MegaPlug Family

To make things even easier, the MegaPlug 4-Port Hub can be used with the MegaPlug Ethernet Adapter and Wireless Network Extender, extending your network options even further. Instead of stringing Ethernet cables all over your home or office, use the power lines that already connect your rooms to complete your network. Set up is a breeze; in no time, you'll be enjoying the endless benefits of networking your devices. Step confidently into the networking age with the MegaPlug 85 Mbps 4-Port Hub.

Features

- No new cables required. Uses your existing power lines.
- Very Easy to Use...Simply plug in
- Perfect for Broadband Modems/Gateways that have a single Ethernet port
- Supports HomePlug speeds up to 85 Mbps
- Integrated QoS (Quality of Service)
- Secure data encryption

MegaPlug™ 85 Mbps 4-Port Hub

Technical Specifications

Standards	IEEE 802.3, HomePlug Turbo Powerline Specification 1.0.1
Additional Protocols	Forward Error Correction (FEC) Automatic Channel Adaptation
Data Rate	Up to 85 Mbps over standard home power lines
Operating Range	Up to 300 meters in wall power lines Capable of passing through circuit breakers
Security	56-bit DES Data Encryption
Frequency Band	4.3 MHz – 20.9 MHz
Modulation	OFDM Symbol Modulation DQPSK DBPSK ROBO Carrier Modulation
QoS	Integrated Prioritized Random Access Contention-Free Access Segment Bursting
LEDs	Power, Link
Power Input	100 to 240V @ 50/60 Hz internal
Regulatory Compliance	FCC Part 15 Class B UL
Environmental Ranges	Temperature: 0°C to 40°C Humidity: 10% to 90% (Non-condensing)
Warranty	Limited 1 Year Warranty

Minimum System Requirements

- Router, Gateway, or other device with HomePlug capability
- Microsoft Windows 2000, XP or Vista
- TCP/IP Network Protocol Installed
- Internet Explorer 4.0+ or Netscape 4.0+

Package Contents

- MegaPlug™ 85 Mbps 4-Port Hub
- Quick Start Guide
- Installation CD
- User Manual on CD
- Ethernet Cable
- Power Cord
