

Tripp Lite UPS System Quick Reference Guide

Intelligent, True On-Line UPS Systems

Complete network power management and control plus true on-line, pure sine wave and zero transfer time operation
Protect Servers, Datacenters & VoIP/Telecom/Lab Equipment

SmartOnline™ UPS Systems

- True on-line operation completely isolates sensitive equipment from every power problem on the AC line by continuously converting AC power to DC and back to AC producing a pure sine wave output—even when there are no power disturbances
- Communication port(s) and included PowerAlert Software provide intelligent network power management and control
- A wide variety of input/output voltage ranges for every application
- Extended runtime capability with additional external battery packs
- Control individual outlets with customized load management receptacles on select models
- SNMP slot accepts an optional internal SNMP/Web card for remote shutdowns, reboots and more
- Rack/tower (slim as 2U) models available
- 3-phase tower models available with 3-phase hardwire input and single-phase or 3-phase hardwire output

Intelligent, Line-Interactive UPS Systems

Complete network power management and control plus automatic voltage regulation
Protect Servers & Network Equipment

Smart UPS Systems

- Advanced line-interactive operation—also known as automatic voltage regulation—keeps equipment working through low voltage (brownouts) and high voltage conditions without draining battery power
- Communication port(s) and included PowerAlert Software provide intelligent network power management and control
- Extended runtime capability with additional external battery packs on select models
- Control individual outlets with customized load management receptacles on select models
- SNMP compatible for remote shutdowns, reboots and more

SmartPro® SMX UPS

- Rack/tower (slim as 1U) models available
- Internal SNMP slot
- Pure sine wave output in battery backup mode

SmartPro® UPS

- Classic tower and rackmount models available
- Long standard runtimes
- Internal SNMP slot on most models

SmartPro® VS UPS

- Compact tower models available
- 9 outlets, 4 communication ports (2 USB and 2 DB9)
- Internal SNMP slot

Line-Interactive UPS Systems

Automatic voltage regulation plus phone/DSL and Ethernet surge protection options
Protect Computers, Workstations, Modems & Peripherals

Omni UPS Systems

- Line-interactive operation—also known as automatic voltage regulation—provides constant, 230V computer-grade power
- Communication port and FREE unattended system shutdown software (web download)
- Phone/DSL/Ethernet surge protection on select models

Omni VS UPS

- Entry-level automatic voltage regulation

AVR UPS

- Low-profile models available
- Phone/DSL surge protection

Digital UPS

- Compact rack/tower (2U) models available
- LCD display shows operating conditions in real time

Standby UPS Systems

Basic, reliable standby battery backup and surge protection
Protect Computers, Modems & Peripherals

Internet UPS

- Phone/DSL surge protection—select models include built-in splitters to protect two devices sharing a single line
- Communication port and FREE unattended system shutdown software (web download)

Why Buy Tripp Lite?

Lower Cost - Tripp Lite's products are typically priced lower than comparable competitive models

Better Value - Lower prices and more features for your customers = higher margins for you!

Post-Sales Support - Comprehensive sales and technical support network

Complete Inventory - Regional warehouses in Holland and Dubai

Technology Innovator - Leading-edge products attract more buyers

Long Term Reliability - Founded in 1922
