Where Enterprise File Security Meets Simplicity

EasiShare, a flagship product of Inspire-Tech, facilitates file productivity and content collaboration without compromising file control and security policies in your organization while allowing you to integrate seamlessly with existing solutions to provide a unified interface to your end users. With EasiShare's intuitive and easy to use interface, users can securely transfer large files with their colleagues and external parties, back up documents and seamlessly sync content across the web, desktop and mobile devices.

EasiShare's unique platform unifies control of related file repositories into a single user interface. This in turn allows IT teams to have complete control over organization's file security through policy management and tracking usage and patterns of user and admin activities.

CHALLENGES

• With stringent security policies to adhere to, the ease of file transfer between users internally and externally is being constrained. With EasiShare, users are able to collaborate easily with their colleagues and external recipients.

• Organizations may not always provide enough backup space for users, resulting in users deploying their own devices for backup which may cause accidental data loss and compromised security of the data.

• All these events lead to users turning to 3rd party solutions, resulting in 'Shadow IT'. Shadow IT inhibits the IT team's ability to be aware of user's activity and may lead to a potential data breach.

RESOURCES AND GETTING STARTED

- Nutanix Resources Library
- Technology Alliances
- EasiShare

SOLUTION ARCHITECTURE/HOW IT WORKS

Files are shared between users within an organization's internal network and to external recipients via a secure platform - EasiShare. Built from ground up to be compatible with air-gapped environments, EasiShare provides a one-way connection between a high security zone (Internal) to a lower security zone (DMZ). Internal users are able to access EasiShare via their mobile devices, desktops or web browsers.

For secure file transfer, from internal users to external recipients, external recipients are prompted to be authenticated via a 2FA method (OTP, digital ID etc). Once authentication is completed, external recipient is able to view-only or download the shared file.

For digital workplace, internal users are able to manage shared folders with permission, perform one-click editing on Microsoft Office documents, tag documents, and access file repositories that have been unified under EasiShare.
KEY BENEFITS

EasiShare is a leading solution that enables enterprise content collaboration in your workplace, users can securely exchange large files, backup documents and seamlessly sync content across the web, desktop and mobile devices.

Architecture
- Choice of 3-tiered architectures
- Standard or Enterprise
- High-availability and Multi-Tenant Ready

Seamless Integration
- Hybrid authentication via Active Directory or App Authentication
- No need to migrate existing storage thanks to EasiShare Storage Connectors
- True File Type scanning of files to prevent file impersonation

Security-Centric
- 2FA authentication on link access
- Built-in device remote wipe
- Multi-stage recycle bin to recover intentional deletions
- Enterprise grade 256-bit encryption in transit and at rest

ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
